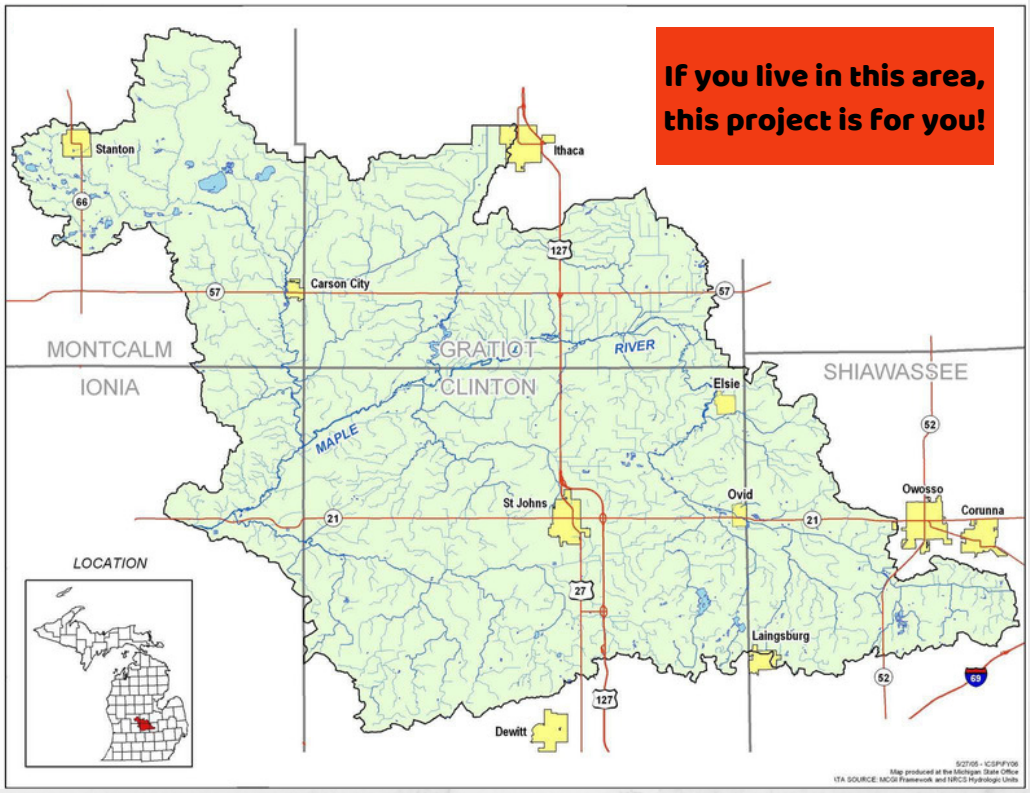
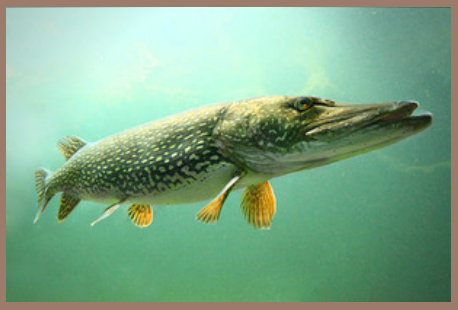
How much soil is washing away from your fields?

COST SHARE MAY BE AVAILABLE FOR YOU!

CLINTON CONSERVATION DISTRICT



Did you know? The conservation practices implemented through this program increase water infiltration and help enhance groundwater replenishment. Water quality benefits from reduced erosion and nutrient runoff, coupled with stable stream temperatures provided by groundwater, improve fish habitat in the Maple River Watershed



LOOKING AT SPRING WASHOUTS AND WONDERING IF THERE IS A COST-EFFECTIVE SOLUTION?

APPLY FOR COST SHARE TO IMPROVE YOUR SOIL QUALITY AND MAPLE RIVER QUALITY

- Cover crops
- Grassed Waterways
